

RemoteScan®

Your scanning virtualization needs . . . answered!

RemoteScan® is *the* accepted standard for scanner virtualization and is used by thousands of companies in over 120 countries.

www.Remote-Scan.com

SHARE a scanner with others on your network.

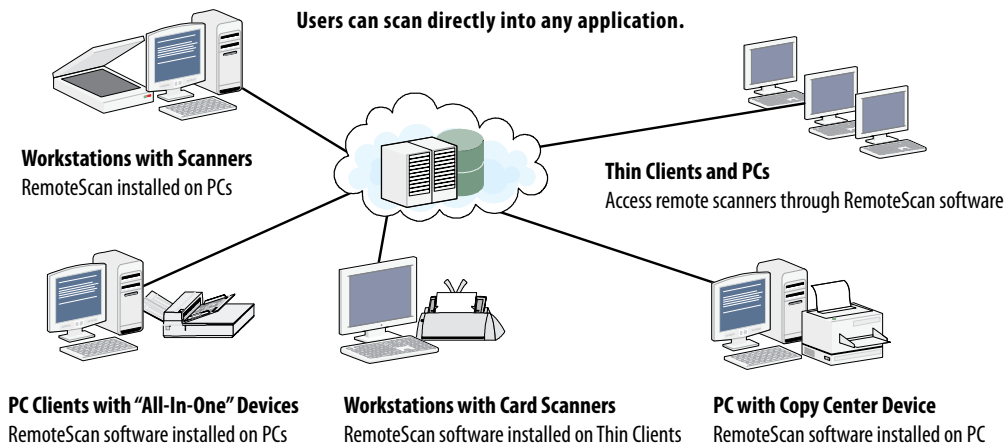

SCAN remotely from thin client workstations or PCs into hosted applications.

CREATE user interface templates to control scanning options.

RemoteScan® is provided as an *Instant Download Software Solution*.

With RemoteScan software, scanners connected directly to client workstations and PCs can be accessed by any software running on Windows® Terminal Services or Citrix® servers. In addition, RemoteScan® is a software solution that turns any document scanner, ID or card scanner, flatbed scanner, or any other imaging device, into a network device right out of the box.

RemoteScan® software installed on Terminal Services or Citrix® servers.
Users can scan directly into any application.

CURRENT CUSTOMERS

Since 2003, RemoteScan has been providing scanning and imaging connectivity solutions to customers worldwide. RemoteScan Corporation currently has customers in over 120 countries, including thousands of hospitals, medical clinics, doctor's offices, banks, accounting firms, insurance agencies, law offices, manufacturing facilities, government offices, universities, and software vendors.

RemoteScan software is recommended and purchased directly by Allscripts Healthcare Solutions, Cerner Corporation, NextGen Healthcare Information Systems, McKesson Corporation, Concentra Inc., and hundreds of other EMR and document management software companies.

A quick search on Google® displays numerous (currently over 50,000 links) end-user, technical-expert forum recommendations and reviews of RemoteScan software.

REMOTESCAN FEATURES

EASY DOCUMENT IMPORT

End users can scan directly from their workstation directly into any hosted application.

INSTANT DOWNLOAD

Easy installation and simple setup even on large networks.

WORKS FLAWLESSLY

with all versions of Windows Terminal Services and Citrix®.

SECURE

Native RDP and ICA protocols. No need to change firewall configurations.

COMPATIBILITY

Works effortlessly with all modern scanners, including imaging devices, high-end scanners, duplex scanners, "all-in-one" devices, card scanners, and flatbed scanners. Any combination of scanners can be shared on a network with RemoteScan.

LOSSLESS COMPRESSION

Does not appreciably slow down network traffic.

CUSTOMIZABLE TEMPLATES

Allows you to create templates to enable consistency in users' scanning choices even among many different brands and models of scanners.

RemoteScan is a registered mark of RemoteScan Corporation. Windows is a registered mark of Microsoft Corporation. Citrix is a registered mark of Citrix Systems, Inc. Other trademarks are the properties of their owners.

HUNDREDS OF USES FOR REMOTESCAN®

Medical: RemoteScan® works with all EMR, patient billing and medical software systems. RemoteScan makes it easy to scan ID cards and other paper documents directly into any paperless work-flow.

Document Management: RemoteScan works with all document management and financial software systems, including accounting, financial and banking software systems. RemoteScan allows satellite offices and bank branches to utilize any scanning software with their paperless work-flow solutions.

WebCams: With RemoteScan, imaging devices, including webcams, digital cameras, digital microscopes, etc. can be used in the same way as a scanner, and software applications that incorporate either scanning or image acquisition can share and access imaging devices that are connected to remote client work stations or PC's. *RemoteScan is used with ID badge creation software systems*

INSTALLING REMOTESCAN

RemoteScan software is provided as downloadable, self-installing executable. The setup program walks users through the installation and configuration steps. Downloading, installing and configuring of RemoteScan takes only a few minutes, and does not require technical expertise.

RemoteScan is installed on each computer or Thin Client appliance where scanners are directly attached, as well as onto any computer which needs to access the scanners. In Terminal Services / Citrix® environments, RemoteScan is also installed on the Windows Terminal Services / Citrix® Server or 'server farm'. RemoteScan® becomes the user interface for the installed scanner.

U.S. COMPANY

Since 2003, RemoteScan has been providing scanning and imaging connectivity solutions to customers worldwide. Excellent sales and technical support. *No outsourcing!*
